I Introduction

1.Cisco Broadworks Introduction

Cisco BroadWorks, as the world's leading cloud business communication platform, not only provides excellent security and reliability, but also guarantees up to 99.999% availability and full redundancy. It has full Cisco Broadworks capabilities and supports more than 26 million enterprise users worldwide, ranging from small and micro businesses to multinational corporations. Based on its open architecture, all series of Fision phones support the automatic deployment service of Cisco Broadworks as SIP server, which eliminates the tedious manual deployment process for users and brings more convenience to users.

2.Description Of Solution

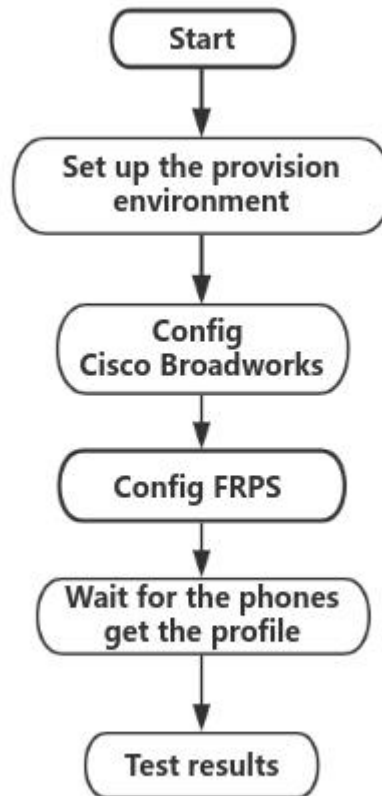

This solution is designed to help you quickly deploy a large number of IP phones across the network on Cisco Broadworks in RPS mode, and initialize the device configuration to save you a lot of time.

3.Explain

Some configurations described in this article need to be pre-configured by the administrator. Please contact FLYINGVOICE support for assistance.

II Configuration Flow

II Configuration Operation

1.Set up the provision environment

1.1 Required platforms and products

FLYINGVOICE FRPS Device Management System、Cisco Broadworks(Ready to use)、Many FLYINGVOICE IP Phones

1.2 Premise

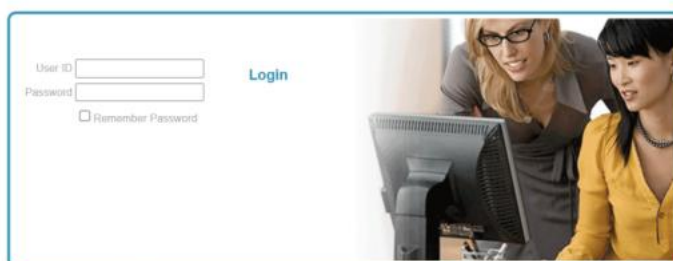

1.2.1 The phones must be in factory Settings. If your phones have been configured, restore them to factory Settings.

1.2.2 The phones and Cisco Broadworks must be connected to the network.

2.Config Cisco Broadworks

2.1 Login the Cisco Broadworks management web

Contact the network administrator to obtain Cisco Broadworks login web interface, user ID and password information, login Cisco Broadworks web page management page.

2.2 Add Identity/Device Profiles

Steps: Resources--》 Identity/Device Profiles--》 Fill in infomations--》 OK.

Attention:

You must register the device Profile under administrator rights, please contact the administrator to operate here.

- Options:
- ① Profile
 - ▶ Resources
 - Services
 - Acct/Auth Codes
 - Call Center
 - Calling Plan
 - Communication Barring

 - Utilities

Resources

Configuration

Call Recording Platform

Select a recording platform for your group.

Group Paging Targets Capacity

Display the maximum number of target users each paging group may have.

Identity/Device Endpoints

Display the identity/device endpoints assigned in the group.

Identity/Device Profiles

Add, modify, or remove group level identity/device profiles in the group.

Domains

Display the list of domains assigned to your group.

Network Classes of Service

Display the list of Network Classes of Service assigned to your group.

Numbers

Display the list of phone numbers assigned to your group and assign those numbers to departments.

Office Zones

Display the list of Office Zones assigned to your group.

Route Point External Systems

Display the list of route point external systems assigned to your group.

Services

Assignment

Assign Domains

Add or remove domains for your group.

Assign Network Classes of Service

Add or remove Network Classes of Service for your group.

Assign Numbers

Add or remove phone numbers for your group.

Assign Route Point External Systems

Add or remove route point external systems.

Assign Group Services

Assign or unassign group services for your group.

Assign Xsi Policy Profile

Add or remove Xsi policy profile for your group.

New User Services Template

Add or remove user services and service packs for the user template, which is applied when a new user is created.

Existing User Services

Assign or unassign user services and service packs for all users in your group.

IMRNs

Add or remove IMRNs for your group.

Identity/Device Profile Add

Add a new group identity/device profile.

③ OK Cancel

Group: Flying_voice>%Flying_voice_group1

① * Identity/Device Profile Name: P21W

Identity/Device Profile Type: Flyingvoice_FIP11C

Protocol: SIP 2.0

Host Name/IP Address: 001F24384A1 Port: 5060

Transport: UDP

MAC Address: _____

Serial Number: _____

Physical Location: _____

Authentication

② Use Identity/Device Profile Type Credentials

Use Custom Credentials

* Device Access User Name: test

* Device Access Password: _____

* Re-type Device Access Password: _____

OK Cancel

The parameters are described in the following table:

Parameters	Description
MAC Address Identity/Device Profile Name	Fill in a custom name for the Profile.
Identity/Device Profile Type	Select the Profile type that has been entered. (Please contact the technical staff for input)
Device Type URL	Provision URL, this is important information, need to fill in the FRPS system configuration, please make a record.
Protocol	The protocol used by Profile is only the standard SIP 2.0 protocol.
Host Name/IP Address	Fill in the IP address of the phone to be deployed.

Transport		Select the transmission protocol, the default UDP.
Port		Fill in the registration port used by the phone, the default 5060 for Feiyin phone.
MAC Address		Fill in the MAC address of the phone.
Use Custom Credentials	Device Access User Name	The Profile authentication user name, this is important information, need to fill in the FRPS system configuration, please make a record.
	Device Access Password	The Profile authentication user password, this is important information, need to fill in the FRPS system configuration, please make a record.
	Re-type Device Access Password	Reenter Profile's authenticated user password to confirm.

After filling in the parameters, click OK, go back to the upper interface and click Search to see the added Profile.

Identity/Device Profiles

Add or modify group level identity/device profiles. Displays all the identity/device profiles defined at group level.

2.3 Bind the address (extension) for the Profile

Enter the user interface of the corresponding extension number. (One extension number corresponds to one user)

Steps: Profile(administrator) --> Users--> Select target--> Address--> Input parameters--> OK.

Options: ①

- Profile
- Resources
- Services
- Acct/Auth Codes
- Call Center
- Calling Plan
- Communication Barring
- Meet-Me Conferencing
- Utilities

Profile

Basic ②

Users

Add, modify, or remove users.

Profile

View or modify your group profile information.

Administrators

Add, modify, or remove group administrators and department administrators.

Announcement Repository

Manage the announcements for a group.

Departments

Add, modify, or remove departments in your group.

Schedules

Add, modify, or remove schedules.

Advanced

Activation Code Device Onboarding Policies

Configure group level Activation Code Device Onboarding Policies.

Call Processing Policies

Configure group-level Call Processing Policies.

Communication Barring Authorization Codes

Configure group-level Communication Barring authorization codes.

Dial Plan Policy

Configure group-level Dial Plan Policy.

Group Web Policies

Configure group-level web policies.

Virtual On-Net Enterprise Extensions

Create and manage Virtual On-Net Users.

Dialable Caller ID

Automatically prepend digits to the incoming caller ID of public calls so the caller ID is presented in dialable format.

STIR-SHAKEN

Configure STIR-SHAKEN signing, tagging, and verification.

Options:

4.Auto-provisioning on IP Phones

Wait for the phones to restart and take effect the configurations.

IV Test result verification

1.How to determine the status of auto-provisioning?

After the phone is successfully provisioned, you can check whether the phone is successfully provisioned on the FRPS system, check whether the account key turns green on the phone, or check the registration status on the phone Web page to check whether the phone is successfully provisioned.

Checking route:Device Manage -->> Redirect Status

V Appdix

How can I find the Provision URL, username and password of FRPS?

You can find this information on **Cisco Broadworks**.

Query method:

Re-enter **Resources**-- » **Identity/Device Profiles** --» Enter the Profile you have created--» Find the infomations.(Device Type URL corresponding Provision URL,Device Access User Name corresponding username,Device Access User Password corresponding password.)

Tips:

The Device Access User Password is invisible by default on Cisco Broadworks. If you forget the password, you can reset it here.
