I Introduction

1. Feature Introduction

Network ad hoc conference is one of the special features of Cisco BroadWorks. This test group covers ad hoc conference scenarios for which the conference is mixed in the network by a Cisco BroadWorks Media Server. The conference creator is the administrator of the conference by default. The administrator can see the participant list and manage all participants (including himself).

II Configuration Process

III Configuration Operations

1. Config Cisco BroadWorks

① Log in to Cisco BroadWorks

Operation steps:

Enter the Cisco BroadWorks address in the browser -- » Enter the User ID and Password --» Click Login--» Login successful--» Enter the user interface corresponding to the line you need to use.

Assign Services--> Select the required Services (N-way call and Three-way call)-->
Add--> The required Services appears in the box on the right--> Apply.

Enterprise > Flying_voice_group1 > Users : 9725983507@iop1as.tekvizion.com

Welcome

Options:

- ▶ **Profile**
 - Incoming Calls
 - Outgoing Calls
 - Call Control
 - Calling Plans
 - Client Applications
 - Messaging
 - Communication Barring
 - Utilities

Profile

Basic

Profile
Display and configure profile information such as your name, department and address.

Addresses
Addresses allows you to view and maintain your phone numbers and other identities that are used to make and receive calls.

Announcement Repository
Manage the announcements for a user.

Passwords
Set web access and portal passwords.

Schedules
Add, modify, or remove schedules.

Advanced

① **Assign Services**
Assign or unassign services and service packs.

Assign Xsi Policy Profile
Assign a Xsi policy profile for a user.

Call Application Policies
Select Call Control Applications enabled for a user.

Call Policies
Configure user Call Policies

Call Processing Policies
Configure user-level Call Processing Policies

②Parameter configuration

This parameter requires background configuration, please contact Flyingvoice support for help.

IV Test Result

Use three P2X series Flyingvoice IP phones to test the results. The test extension are 3507, 3508, and 3509.

Test steps:

1. 3508 dials 3507, 3507 rings.
2. 3507 is connected, press the **conference** button to dial 3509.
3. 3509 rings and is connected.
4. 3507 press the **conference** key again to connect the three-party conference.
5. 3507 Press the **manage** key to display the following manage interface:

6. Select one of the numbers and press the **remove** key, and the user will be removed from the conference.
